OBJECTIVE

Aspiring Software Developer with a strong foundation in programming and web development. Skilled in problem-solving, analytical thinking, and learning new technologies. Seeking an entry-level opportunity in a growth-oriented organization to apply technical knowledge, enhance skills, and contribute effectively to organizational success.

EDUCATION

Bachelor of Engineering in Information Science Engineering

Sri Krishna Institute of Technology

CGPA: 8.35

Expected Graduation: May 2027

Pre-University College (PCMB)

BGS PU College, Nagarur

Percentage: 86.7%

July 2023

Secondary School Leaving Certificate (SSLC)

Bhoruka English School

Percentage: 99.36%

July 2021

SKILLS

Programming Languages	C, Java, Python
Web Technologies	HTML, CSS, JavaScript, React
Databases	MySQL, MongoDB
Data Analytics	Microsoft Excel, Power BI
Tools and Platforms	Git, GitHub, Visual Studio Code
Operating Systems	Windows, Linux (Basics)

PROJECTS

Smart Complaint Management System – SKIT. Technologies: HTML, CSS, JavaScript, MongoDB, MySQL. Built and deployed a full-stack complaint management system for complaint submission, tracking, user management, and resolution workflows, improving efficiency in issue handling.

Universal Bidirectional Sign Language Translator. Technologies: Python, Machine Learning, Computer Vision. Developing a system to translate sign language into text/speech and vice versa. Conducting literature survey and analyzing existing models and technologies to improve communication accessibility for hearing and speech-impaired individuals.

User Registration and CSV Management System (Django). Technologies: Django, Python, SQLite, HTML, CSS. Developed and deployed a web application with secure user registration and login authentication. Implemented validation to prevent duplicate registrations and generated CSV reports containing user name, email, and timestamp data.

IndiaAssist – Safety and Travel Companion App. Technologies: HTML, CSS, JavaScript, React, MongoDB. Developed a full-stack web application for travel planning and safety assistance. Designed intuitive user interfaces and integrated backend functionalities to enhance user experience through real-time assistance features.

To-Do List Web Application. Technologies: HTML, CSS, JavaScript. Designed and developed a responsive task management application with task creation, deletion, and status tracking features. Focused on user-friendly design and efficient task organization.

Smart Blind Stick using Ultrasonic Sensors. Technologies: Arduino, Ultrasonic Sensors, Embedded Systems, C. Developed an IoT-based assistive device for visually impaired individuals. Integrated ultrasonic sensors for obstacle detection and real-time alerts to improve safety and navigation.

INTERNSHIP

Web Development Intern

June 2026 – August 2026

VaultofCodes (Remote)

- Selected for a 2-month Training & Internship Program in Web Development.
- Working on real-world web development projects using modern web technologies.
- Gaining hands-on experience in frontend development, project implementation, and collaborative development practices.
- Strengthening practical skills in HTML, CSS, JavaScript, and modern web development workflows.

CERTIFICATIONS

- SAP Code Unnati Program (Edunet Foundation) – Advanced Training in AI/ML, Deep Learning, Edge Computing, SAP Analytics Cloud and SAP ABAP.
- IBM SkillsBuild – AI & Data Analytics, Cloud Computing.
- Infosys Springboard – Python Programming, AI Fundamentals, Frontend Web Development.
- Oracle Academy – Database Management Systems.
- Celonis Academy – Process Mining Fundamentals.
- MongoDB University – MongoDB & NoSQL Databases.
- Saylor Academy – Machine Learning.

ADDITIONAL INFORMATION

- Languages Known: English, Kannada, Hindi
- Strengths: Problem Solving, Analytical Thinking, Team Collaboration
